

OSCN COMMUNITY MEET-UP

Our next **OSCN Community Meet-Up** is coming up! Join us on Thursday, March 26 at the Cultuurcafé from 16:00 onwards for an informal get-together. It's a great chance to catch up, meet new people, and enjoy a drink together. Feel free to bring a colleague along.

We'll be easy to spot near the OSCN banner, so come say hello!

P.S. OSCN members: the Christmas card you received is still valid for a free drink, so be sure to bring it with you.

OPEN ACCESS PUBLISHING PRESENTATION

Curious to learn more about open access? On **Thursday, 19 March, 12:30–13:00**, **Esther Tijchon** from the Library of Science will give a presentation in **HG00.218**.

During this session, you will learn about recent developments in open access publishing, as well as potential pitfalls and other factors to consider before publication, such as questionable publishers. The open access landscape can be challenging to navigate, and this presentation will help you gain an overview of your possibilities. There will also be time for questions.

Register via the [Library Calendar](#). There are only a few seats left. If you can't attend, you can always contact the Library for guidance.

JOIN THE NEXT LIBRARY OF SCIENCE EVENTS

If the 19 March session is too soon or you want to plan ahead, you might also be interested in these **other events** presented by the Library of Science. Register quickly, as seats are limited!

- **Mon, 23 Mar, 12:30–13:15**

Publishing on OA Platforms
Learn about alternative open access platforms and how they can help build a more sustainable and equitable research ecosystem. In-Person, HG00.218. [Register here](#).

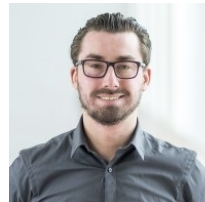

OPEN SCIENCE INSPIRATORS

As part of our efforts to build a network of OSCN contact persons across all faculties and institutes in Nijmegen, OSCN recently spoke with two colleagues who are actively promoting Open Science within their work:

Lindsay Janssen (Faculty of Arts, Department of Modern Languages and Cultures) integrates Open Science principles in her work on literature education and historical research resources. She is motivated by the idea of making knowledge accessible beyond academia and encourages critical reflection on barriers such as paywalls and restricted access to sources. Read the [full interview](#) with Lindsay.

Tom Ederveen (Medical BioSciences, Radboudumc) works as a bioinformatician and strongly advocates making research data FAIR (Findable, Accessible, Interoperable and Reusable). For him, working openly is not just a technical or administrative task, but a matter of scientific integrity and responsibility towards research participants and society. Read the [full interview](#) with Tom.

We are still looking for more OSCN contact persons!

It is an informal role where you help keep Open Science discussions alive, share ideas, and connect your department with the OSCN community. Interested? Get in touch at openscience.nijmegen@gmail.com.
