

OPEN SCIENCE INSPIRATOR: HUBERT KORZILIUS

For the *Radboud Open Science Inspirator* feature, OSCN spoke with Hubert Korzilius (Associate Professor of Methods, Faculty of Management Sciences). Although he does not immediately describe himself as “Open Science minded,” his work clearly illustrates how Open Science takes shape in everyday research practice.

SAYING GOODBYE & WELCOMING A NEW OSCN TEAM MEMBER

A goodbye note from Jenni

Dear OSCN-community! After four years in Nijmegen and almost four years at OSCN, it's time for me to leave Nijmegen and with that, also leaving the OSCN! It's been such a wonderful experience being part of this community and being part of the team shaping it! Thank you all for making this such a fun experience!

Introducing Karin

Hi, I'm Karin Kastens. I am the Head Librarian at the Max Planck Institute for Psycholinguistics, which is part of the German Max Planck Society. Supporting Open Access and Open Science is a key part of my work. I enjoy helping our researchers find ways to publish open access, and I'm also interested in new open access and open science formats. Outside of work, I enjoy hiking, travelling, and watching crime drama series.

Join the OSCN Team!

Do you want to help shape the future of Open Science in Nijmegen? Join our enthusiastic OSCN team to contribute to events and community building. Gain valuable experience, expand your network, and support Open Science at Radboud University, Radboudumc, MPI, HAN, and beyond. Funding is available. Interested? Email us at openscience.nijmegen@gmail.com.

OSC-NL KNOWLEDGE EXCHANGE DAY

Earlier this month, on February 6th, we had another Knowledge Exchange Day at SURF in Utrecht. The central theme of the day was onboarding: how do we welcome new people into our communities in ways that are meaningful, sustainable, and inclusive?

Two guest speakers shared experiences from their own communities, offering practical insights into what effective onboarding can look like. A key takeaway resonated strongly throughout the day: meet people where they're at. This means understanding who your community typically attracts, what motivates them, and—crucially—what they stand to gain by joining. Making this value explicit helps newcomers feel seen and supported from the start. Make it clear that there are different levels of engagement, and that all of these are welcome. It might also help to lower barriers of entry and make entry points more widespread.

In breakouts, we reflected on what truly makes people feel welcome. In-person interaction emerged as the preferred and most impactful way of onboarding newcomers, especially in the early stages. At the same time, small and simple actions—such as a thoughtful welcome email

—can make a big difference. Participants also explored “paying it forward” as a sustainable model, where established members help welcome new ones, strengthening community bonds in the process.

Another recurring theme was the importance of shared values: communities benefit from regularly reflecting on whether those values are still aligned and actively lived.

In addition to onboarding, the day followed a barcamp-style approach, where we voted on topics we wanted to further explore together. The additional sessions focused on developing a shared onboarding template, providing input for an upcoming interview on time investment in open science as a PhD, and exchanging experiences on managing community work within local communities.

The next Knowledge Exchange Day has already been scheduled and will take place in June. We look forward to continuing the conversation and building stronger, more welcoming Open Science communities together.

NEWS FLASHES

- The **Open Science Week 2026** will be held in Week 38 (14–18 September). Please mark your agenda and stay tuned for more details!
- The next **informal community meet-up** will take place on March 26th at the Cultuurcafé, beginning at 16:00. Everyone is welcome to join.
