

WHAT'S YOUR ORCID?

In our [final newsletter of 2025](#), we shared **7 easy ways to make 2026 more open**. The one way we promised to tell you more about is the creation of an Open Researcher and Contributor ID, or ORCID. This is a (free and unique) persistent identifier that individuals can use for all their research activities. ORCID refers to the combination of a 16-digit number and the profile that is linked to it. This profile consists of all your research activities and the good thing is, these activities are automatically linked and stored. So, less

administration for you and more time to engage in research activities (or anything else, of course ;)). Another advantage of ORCID is name flexibility. ORCID helps reduce the negative consequences of name changes so you will no longer be limited to the name you used when you began your career. On the ORCID website you can find [more information on how ORCID can benefit you\(r work\)](#) and [create your own ORCID](#).

FUNDING FOR CITIZEN SCIENCE HUBS

Great news for citizen science, [Open Science NL](#) awarded five 400k grants to expand citizen science hubs at research organizations. One of these projects - De BRUG - is a partnership between **Radboud University, Radboud university medical center, University of Applied Sciences Arnhem-Nijmegen (HAN), Avans University of Applied Sciences, Maastricht University, Maastricht**

UMC+, the Open University of the Netherlands, Burgerkracht Limburg and participation hub Rijk van Nijmegen. It focuses on engaging diverse citizen groups in citizen science, particularly those who are currently underrepresented. The project will support inclusive citizen science projects by sharing knowledge and strategies to facilitate active participation. The exchange between different research disciplines is at the heart of our approach. With a strong regional southern focus, the hub supports collaboration between organizations and citizens on local topics such as nature and environment, health, well-being, and cultural heritage. By combining knowledge and using good practices, the project strengthens citizen science, enhancing its diversity, inclusivity, and overall impact.

You can read more about the other projects that received funding on the [website of Open Science NL](#).

OSCN COMMUNITY MEET-UP

Next week, it's time for another edition of the OSCN Community Meet-Up. **We will meet at the Cultuurcafé on Thursday January 29th, starting at 16h.** All are welcome to chat and have a drink, so feel free to bring a colleague. Come and find us near our banner :D

Ps. If you are an OSCN member, don't forget to show us the Christmas Card you received (for a free drink)!

NEWS FLASHES

- More news from Open Science NL. Just before the end of 2025, they announced that **27 replication projects will receive funding**. Find out [here](#) which cornerstone studies will be replicated in the next three years.
- You can still sign up for the 2-day event [Towards New Horizons of Scholarly Publishing](#) (February 5-6, Nijmegen).
