

BACK IN BUSINESS

It's been a while since you last heard from us, so it feels as if a renewed introduction is justified. We are Max Cenci (RUMC), Anita Eerland (RU), Hannah Peetz (RU), and Jenni Sander (MPI), the coordinating team of the Open Science Community Nijmegen (OSCN). The community was launched in 2019 and has organised events, workshops, discussion sessions and a [ReproducibiliTea](#) journal club in the past. After going through some internal reorganisation in 2022, OSCN is back in business since 2023. We've been working on a new website so that we can offer membership (as announced in our latest newsletter). After all, we cannot be a thriving community without your involvement. To celebrate that we are back in business, and to be more visible (and accessible), we will organize a relaunch event in the nearby future! We are looking forward to meet you and build OSCN together!

CREATING A LOCAL COMMUNITY

OSCN is one of the thirteen OSCs in the Netherlands that are connected through the [Dutch National Network of Open Science Communities \(OSCNL\)](#). And while OSCN was one of the first OSCs to be established, it is one of the last to offer membership. Members are crucial because they form the actual community.

Membership is an expression of interest in Open Science. Members do not have to be an expert in Open Science practices. We are - after all - a learning community. If you do have experience with certain Open Science practices, you can indicate those when signing up as a member. You

can also list what topics you would like to learn more about. By displaying our members, their knowledge and needs on our website, you can easily find - and reach out to - others (e.g., when you have a specific OS related question or are looking for collaborators on a specific OS related project).

Becoming a member is free of charge and open to all affiliated with Radboud University, Radboud University Medical Center, and Max Planck Institute for Psycholinguistics (and hopefully in the nearby future, also HAN). You can easily become a member of OSCN by clicking on the button below.

NATIONAL OPEN SCIENCE WEEK

What better time to announce the relaunch of OSCN than during the first National Open Science Week. This week is organized by the [Dutch National Network of Open Science Communities \(OSCNL\)](#) to celebrate and recognize the crucial role of Open Science in the advancement of science. From September 23 to 27, several local Open Science Communities organize a variety of Open Science events. To find out more about participating communities and their events [visit the website](#). We are looking forward to participate as OSCN next year too!

NEWS FLASHES

- The national [Open Science Festival](#) will take place on October 22 in Maastricht. Registration is currently closed but you can still [sign up for the waiting list](#).
- Are you ready for a future of publishing that embraces community-driven Open Science values? Please consider signing the [Call to Commitment Petition](#).
- Last year, the Dutch Research Council (NWO) awarded all Dutch OSCs an Impulse Grant for three years to help them build a strong foundation of their local community.
- In addition to that, [400k was awarded to set up an executive team of the Dutch network of OSCs \(OSCNL\)](#). This team will facilitate the collaboration between OSCs in the Netherlands and develop initiatives to increase the impact of local OSCs (and their members).
- The [International Network of Open Science and Scholarship Communities \(INOSC\)](#), that OSCN is a member of, now consists of 37 local OSCs around the world (and counting).
