

OPEN SCIENCE EVENT NIJMEGEN

The Open Science Task force from the Radboudumc Research Institute for Medical Innovation and the Open Science Community Nijmegen are promoting the Open Science & Reproducibility Research Event in September! Join us on **8–9 September 2025** for two days of inspiring keynotes, interactive sessions, and community exchange centered on advancing open, transparent, and reproducible research.

International thought leaders **Prof. Lex Bouter** (VU Amsterdam) and **Prof. David Moher** (OHRI, Ottawa) will headline the symposium, alongside national and institutional voices pushing the boundaries of good scientific practice. On Day 1, we'll explore the latest developments in open science, research integrity, and responsible research assessment. Day 2 offers a hands-on train-the-trainer workshop on preregistration led by **IRISE**.

Satellite Session on Research Impact (8 Sept, 09:00–11:00)

Hosted by the Orofacial Health Research Program at Radboudumc, this morning session brings together local, national and international stakeholders and community members to explore the question: **"Research Impact: How Do We Define and Demonstrate What Matters?"**

Expect an engaging discussion on how we can align research outputs with real-world outcomes, both within and beyond the health sciences.

PhD candidates, researchers, support staff, and anyone curious about building a more open and impactful research culture — this event is for you!

Registration and the full program can be found [here](#).

JOIN THE OSCN ORGANIZING TEAM

If you are interested in Open Science (and we assume you are :) and would like a more active role in this community, **we are looking for you!** We still have some budget (from NWO) for people interested in joining the OSCN organizing team. As part of the team, you will help thinking about and organizing activities related to the goals of OSCN. We offer the opportunity to **work in a diverse team, learn about and take part in local, national, and international**

developments in the world of Open Science. Ideally, we would like to see representatives of all research institutes (and the faculties within) to be part of this team, to ensure the grassroots character of this community. If this sounds like an opportunity for you, or if you would like more information, let us know by dropping us an email (openscience.nijmegen@gmail.com).

- After the summer, OSCN will introduce their very **own beer coasters** for the informal meet-ups at the Cultuurcafé.
- As part of the Open Science Program at Radboud University, Martine Zwets is working on a **series of interviews** with people working on Open Science - to inspire others. Her latest interview is with [Simone Haarbosch](#).
- **Reminder** We are still looking for ideas for the national Open Science Week in September. Whether you would like to discuss the ethical sides of Open Science, exchange experiences with Open Science with OSCN members from other institutes, or just have a drink to get to know other community members, just let us know. You can [leave a digital sticky note here](#).
- **Reminder** For everyone interested in **Citizen Science**, there will be a [national Citizen Science Expo](#) on **October 2, 2025** in Amsterdam.
- **Reminder** We are still looking for people that are willing to **'host' our OSCN banner for one or two weeks**, to raise awareness of OSCN. If you are interested, please send an email to openscience.nijmegen@gmail.com
