

On September 25 - during the National OS Week - about 20 people interested in Open Science gathered at the Cultuurcafé. Over drinks and snacks many issues - not all OS related - were discussed. These informal meet-ups are a great way to meet new people from your own and other institutes. If you missed this one, please make sure to mark your calendar for the next edition: **November 20th**, starting at 16h, Cultuurcafé.

Below you will find other upcoming events that might be of interest to you:

- **October 7: Trial and Error Award Symposium** is a one-day symposium to explore failure in the context of scientific research. The event brings together researchers, editors, and advocates working to reframe how failure, uncertainty, and success are understood and how they can all be taken seriously as a part of knowledge production. Location: University Museum Utrecht. You can register [here](#).
- **October 14:** The Institute for Science and Society organizes a **symposium on Problematic Science**. Elisabeth Bik, Stan van Pelt, and Maud Bernisson will talk about errors, misconduct, and fraude. Access is free, no registration needed. The event takes place at Radboud University, **EOS N 01.630, 15:30-17:30h**.

NEW ADDITIONS TO THE OSCN TEAM

Hello everyone, my name is **Lieke Corbeek**, and I joined the OSCN team in September 2025. I studied Medical Biology at Radboud University with a specialization in Science, Management, and Innovation. Currently, I am pursuing a Pre-Master's in Communication Science, also at Radboud University. In my free time, I enjoy playing korfbal and spending time with friends. At OSCN I will be supporting various activities, including social media, the website, newsletters, and organizing small events for our members.

Hi, my name is **Tim Middeldorp** and I joined the OSCN organizing team in August 2025 as a communication advisor for the Open Science programme. Open Science appeals to me because I'm concerned about the growing distrust towards science. Openness and accountability can help address this challenge. Additionally, I work for the Faculty of Science as a content specialist. I have a background in Cultural Studies and Media Studies, and I worked as a teacher at a secondary school for several years. In my daily life, I enjoy meeting up with friends, going on city trips, and I'm on a mission with my daughter to visit all the playgrounds in Arnhem.

JOIN THE OSCN TEAM

Do you also want to help shape the future of Open Science in Nijmegen? **We are looking for enthusiastic members to join the OSCN organization team.**

As part of the team, you will:

- Contribute to planning events and activities for our community.
- Collaborate with colleagues passionate about Open Science.
- Gain valuable experience in community building and science communication.

This is a great opportunity to get more actively involved, expand your network, and support the growth of Open Science practices at Radboud University, Radboudumc, MPI, HAN and beyond.

There is funding to compensate OSCN team members for the hours they work for the community. **Interested?** Let us know by dropping us an email (openscience.nijmegen@gmail.com).

We look forward to working with you!

NEWS FLASHES

- The latest interview in the **Open Science Inspirator** series (by Martine Zwets) is with Anas Maya, data steward at the Faculty of Arts at Radboud University. You can read the interview [here](#).
- Tim Middeldorp will take over the Open Science Inspirator interviews from Martine. If you know of an OS Inspirator that should be interviewed for this series, please let us know! That Inspirator can also be you, of course :D
