

OSCN BANNER ON TOUR

For our first informal community meet-up - in December last year - we created an OSCN banner. The idea was that by putting this banner up, you can easily find us in the Cultuurcafé :D This banner has been travelling with us to all events since. In addition to using this banner for recognition during events, we would also like to use it to raise awareness on our community and increase its visibility. Therefore, **we would like to send our banner on a little visiting tour around campus (HAN, MPI, RU, RUMC).** Our banner already spent two weeks at the MPI, is now making its way to the Donders Institute, and is curious about all of the other buildings. So, if you would like to 'host' our banner for one or two weeks, to raise awareness of OSCN, please send an email to openscience.nijmegen@gmail.com.

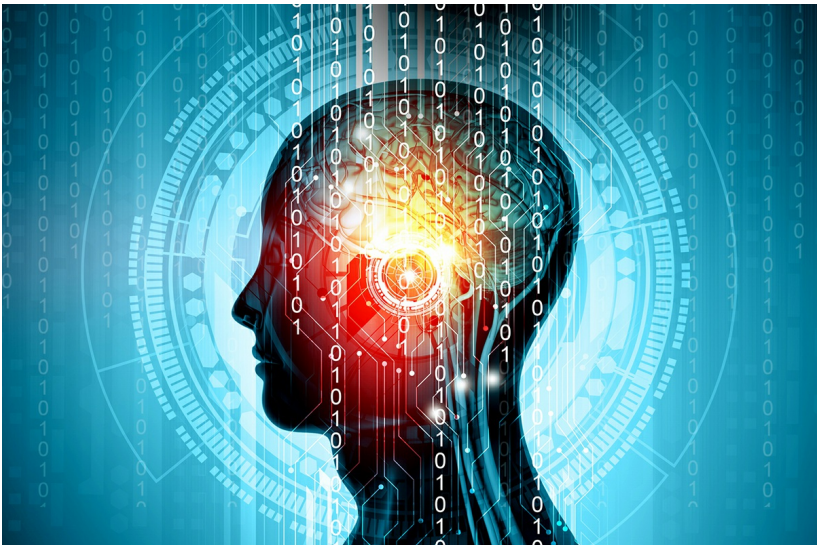

BARCAMP IN GERMANY

We have dissapointing news for those of you who wanted to go to the [Open Science Barcamp](#) in Groningen (October 23) but did not register yet. The event is already fully booked! Registration is therefore no longer possible, but you can sign up for the waiting list. Luckily, there is also a Barcamp in Germany every year (that is where the Open Science Barcamp started). This year, the [German Barcamp](#) takes place in **Berlin on June 18th** and the good news is, registration is still open. You can find out more about this active and inspiring format on [their website](#). The Dutch Barcamp is a satellite event of the National Open Science Festival (Groningen, October 24). Registration for the Festival is not open yet. We will keep you posted!

OPEN SCIENCE AND AI

The [international Open Science Conference 2025](#) will be held on October 8-9 in Hamburg. This year's conference will have a special focus on **the intersection between Open Science and Artificial Intelligence (AI)**. The rapid integration of AI and corresponding tools into scientific research poses both new challenges but also opportunities for Open Science practices and the generation of valuable research knowledge that contributes to solving social, economic, environmental, and digital challenges. This requires a reflection on how this can be aligned with transparency, accessibility, reproducibility, and reusability as core principles of Open Science to ensure robust and reliable research. You can still [submit for a 'solution session', a 'discussion session', or a poster or demo](#).

NEWS FLASHES

- We will continue our series of bi-monthly **informal community meet-ups at the Cultuurcafé**, so please mark your calendar for **June 3rd**, starting at 16h. You can find us near our banner ;)
- On **May 28, 2025, at SURF in Utrecht**, the [Diamond Open Access Expertise Centre](#) and local universities will bring together researchers, librarians, policy advisors, and communication officers for a full-day collaborative event to develop a national Diamond Open Access Discovery Kit. This kit will serve as a practical resource to navigate, promote, and support Diamond OA publishing at the faculty and department levels.
- As part of the Open Science Program at Radboud University, Martine Zwets is working on a **series of interviews** with people working on Open Science - to inspire others. Her latest interview is with [Esther Tijchon on Open Access](#).
