

LOOKING BACK

No doubt that 2024 was an important year for OSCN. After working behind the scenes for a really long time, we were finally able to get the ball rolling again with a new website, membership, and a new format for the newsletter. We were overwhelmed by the positive reactions from people to the revival of the community. In addition to that, we received funding from NWO and support from RU so that we could increase our time spend on OSCN, expand the core team, and host our first (social) event in years! Finally being able to move forward and take OSCN to the next level, really gave us a lot of energy. So did meeting with some of you last week. We would like to thank you for your (continuous) support of OSCN!

LOOKING FORWARD

While 2024 was an exciting year for OSCN, there is also a lot to look forward to. First of all, the official relaunch event of OSCN which will take place on February 11th. There will be two shorts rounds of discussion, followed by drinks. In our last newsletter, we accidentally mixed up the speakers and their topics. Jan Bransen will talk about open education and Lotte Krabbenborg about the citizen as a scientist ([more information and registration](#)).

We are also looking forward to grow as a community, include the HAN, organize more social events (like the one we had on December 10th), participate in the national Open Science week, etc. Let's make 2025 another great year together!

OUR GROWING TEAM (2)

Hi ! I'm Katrin Sutter and I'm happy to join the OSCN organizing team! I have a PhD in Neuroscience from the Radboud University and currently I work as the Digital Competence Center coordinator at the Radboudumc. I believe Open Science isn't just for experts – it's for anyone looking to make science more open and accessible.

I'm particularly motivated by the FAIR principles. While Findability and Accessibility are improving, I see Interoperability as a challenge where OSCN can make a meaningful impact. I'm eager to work on increasing campus-wide collaboration on Open Science topics, with the goal of broadening these efforts further.

TIPS CHRISTMAS BREAK

December often is a busy month, yet you might find yourself in need of some inspiration for an activity during the Christmas break. No need to panic, the OSCN team has got you covered with these personal tips:

- 1) **Bake cinnamon rolls.** There are plenty of good recipes, so find one that suits you and your kitchen best (Hannah).
- 2) **Make candied almonds.** Mix 200g sugar, 100ml water, and 1/2tbs cinnamon and heat up in a large pan. Add 200g almonds (without skin) when texture is boiling. Stir until liquid is gone. Lower temperature and continue stirring until the almonds are shining (Jenni).
- 3) Since I am from Brazil, normally my tip would be to go to the beach and have a BBQ. The closest thing to that for the Netherlands is to **take part in a 'Nieuwjaarsduik'** for a fresh start of 2025 (Max).
- 4) **Start your festive days with a morning run/walk!** It's a great way to clear your mind and boost your energy before indulging in the holiday treats (Katrin)
- 5) **Watch the movie Love Actually.** This is my all-time favourite Christmas movie (Anita).

Whatever your plans are, we wish you happy holidays, and all the best for 2025!

NEWS FLASHES

- The [webpage for the Open Science Program of Radboud University](#) is now live. You can find here information about the program, but also a lot of inspiration and practical information regarding OS practices.
- Recently, [an article on how the budget cuts for science can lead to opportunities for Open Access](#) was published in Science Guide.
- **REMINDER:** Since we would like to increase our online visibility in 2025, please [indicate here](#) via what social media platforms you would like to hear from us.
