

NATIONAL OPEN SCIENCE WEEK

Last year, the network of [Open Science Communities in the Netherlands \(OSC-NL\)](#) organized the first national Open Science week to celebrate and recognize the importance of Open Science. During this week, Open Science Communities organized a variety of Open Science events. As OSCN was in the middle of its reorganization, we decided to wait for the second edition of the national Open Science Week.

This year, the national Open Science Week will take place from **September 22-26**. OSCN would really like take part in this national celebration of Open Science by organizing activities. But, **we need input from you!** You can [leave a digital sticky note on our wall](#) to let us know what kind of events or activities you would like OSCN to host. What are your needs, or those of your colleagues? What would be a fun, inspiring, informative and/or community building event? No registration is required, just click on the big yellow button on the right to add your thoughts. Also, you can indicate which ideas of others you really like, or add comments to them. For inspiration you can take a look at [the activities that were organized last year](#) by local Open Science Communities. Let's create this week long event together, as a community!

REPLICATION GAMES

Replication Games are coming to Vrije Universiteit Amsterdam on **19 July!** Organized together with the [Institute for Replication](#), a Replication Games is a one-day hackathon where you and a team of 2-4 other replicators will work together to conduct reproducibility and robustness analyses on a published paper in a top social science journal. By submitting a replication report (which you can do anonymously if desired), you and your team will earn coauthorship on Institute for Replication meta-papers that summarize the reproducibility and robustness of scientific findings throughout entire disciplines (for example, see [the first Institute for Replication meta-paper](#)).

It is possible during the Replication Games to focus on papers in economics, political science, psychology, or general social sciences. You may also use your time at the Amsterdam Replication Games to examine the reproducibility and robustness of papers on deforestation, provided you agree to use a [structured analysis protocol](#).

Replication Games events are great opportunities to learn, to network, and to contribute to mass replication initiatives that improve transparency and trust in science. Though the event will be in-person at Vrije Universiteit Amsterdam, virtual or hybrid participation is always possible. If you're interested, you can [register here](#)!

NEWS FLASHES

- You can now **nominate yourself, or someone else for the Leo Waaijers Open Science Award**. This award will be preseted during the National Open Science Festival in Groningen and recognises an individual or group who, in recent years, has launched a bold, innovative and/or impactful initiative in the field of Open Science. More info on [our website](#).
- As part of the Open Science Program at Radboud University, Martine Zwets is working on a **series of interviews** with people working on Open Science - to inspire others. Her latest interview is with former OSCN coordinator [Jeanette Mostert](#).
- For everyone interested in **Citizen Science**, there will be a [national Citizen Science Expo](#) on **October 2, 2025** in Amsterdam.
- We are still looking for people that are willing to 'host' our OSCN banner for one or two weeks, to raise awareness of OSCN. If you are interested, please send an email to openscience.nijmegen@gmail.com
- Don't forget to **add our upcoming informal community meet-up to your agenda**. We hope to see you all on **June 3rd**, from 16h onwards in the Cultuurcafé (near our banner).
