

OSCN RELAUNCH EVENT

We are excited to let you know that **the official event to relaunch OSCN will take place on February 11th**. The event is organized by [Radboud Reflects](#) and starts with two short rounds of discussion (15:30-16:15h) approaching Open Science from new perspectives. Ethicist Marcel Becker will discuss the opportunities and obstacles of open education with philosopher [Jan Bransen](#) and the citizen as a scientist with sociologist [Lotte Krabbenborg](#). There will be drinks and ample opportunity to further discuss these - and other - topics after the event. You can reserve your (free!) ticket [here](#). We hope to see many of you there, celebrating the relaunch of OSCN with us!

Can't (or don't want to) wait for February? **Join us for drinks in the Cultuurcafé** (Mercatorpad 1, Nijmegen) on December 10th. We will be there from 4pm onwards handing out vouchers for a free drink. We'll also bring OSCN stickers to decorate your laptop, office door, etc. to increase the visibility of OSCN. It would be great if you could [let us know whether or not you are planning to drop by](#) (and if so, whether you are bringing a colleague).

OUR GROWING TEAM

"Hi everyone, my name is Hannah Mannaerts and I will be part of the OSCN organizing team from December 2025. I am originally from Rotterdam, but I have studied Communication Science (bachelor and master) in Nijmegen the last 6 years and since October I am working at the Donders Institute as management assistant. For OSCN I will help in different areas, such as setting up the social media, improving the website and newsletter and organizing different small events for our members. I'm excited to see what the future holds, and I look forward to see what I can do for OSCN."

We are very happy to welcome Hannah as new member of the OSCN organizing team. To help us make a well-informed decision on what social media channels (not) to use for OSCN, please [select the channels of your preference here](#).

OPEN SCIENCE GAMES

Last month, we tipped the [Data Horror Escape Room](#) (because of Halloween) but there are many other Open Science related games out there. So, we will highlight some of them through our newsletter. Next up, is [Last Contact](#), an online escape room that you can play for free with a team up to five people. You and your team need to find out what happened to the crew of an abandoned space ship while learning about Open Science practices. After playing the game, you will enter a museum to learn more about certain Open Science practices. Also, do not forget to make a selfie with your team! If you know of any other Open Science related game, let us know!

NEWS FLASHES

- It's been four years since Massachusetts Institute of Technology (MIT) decided to boycott Elsevier. In [this blog post](#) you can read about how this boycott affected their researchers (and the importance of collective action).
- To get a better idea of who is part of our community, we will introduce a **'meet the member' item** for this newsletter. In this item, members can briefly introduce themselves (like Hannah) and share whatever they like with fellow members. If you would like to be contacted for this item, [leave your contact information here](#), or drop us an email via openscience.nijmegen@gmail.com.
