

A GROWING COMMUNITY

About a month ago, we announced that we were ready to introduce membership. After all, what is a community without members? Since that time, 58 (!) people registered as a member of OSCN. People from different research institutes, research areas, different career stages, and with different Open Science experiences and interest. Bringing these people together is exactly what we were hoping for. A warm welcome to you all! We would love to meet up soon, so we planned a social event (see item in this newsletter). We also added a new feature to our website. All our [newsletters](#) can now be found in our archive.

THE FOUR STAGES OF DEVELOPING
AN OPEN SCIENCE COMMUNITY

EXPANSION OF ORGANIZING TEAM

In our [last newsletter](#), we informed you about the Impulse money that all OSCs in the Netherlands received from NWO. This money is meant to help OSCs get up and running and future-proof. In that context, we are looking for people interested in joining the OSCN organizing team. As part of the team, you will help thinking about and organizing activities related to [the goals of OSCN](#). We offer the opportunity to work in a diverse team, learn about and take part in local, national, and international developments in the world of Open Science. If you are interested, please send an email to introduce yourself

and tell us about your motivation to join the OSCN organizing team to openscience.nijmegen@gmail.com. Applications need to be in no later than **November 18th**.

OSCN SOCIAL EVENT

Behind the scenes, we are working on an official relaunch event for OSCN. But like all other official stuff, it takes a while before things are arranged. Because we would love to meet you - and give you the opportunity to meet other community members, we decided to organize an informal get-together before the end of the year. Please mark your calendar for **December 10th**. We will meet at the Cultuurcafé at 4pm. All are welcome and if you are an [OSCN member](#) you will receive a voucher for a free drink (so, if you are not a member yet, this might be a good time to sign up). We encourage members to bring a plus one. If you do, that person also gets a voucher for a free drink :D As we would like to know how many people we can expect, please [let us know](#) whether or not you are planning to come. We hope to see many of you soon!

BARCAMP AND NATIONAL OPEN SCIENCE FESTIVAL

Last week, the [National Open Science Festival](#) took place in Maastricht. Over 350 researchers, educators, students, and policy makers got together to discuss and work on Open Science in over 40 parallel sessions. Prior to the Festival an [Open Science Barcamp](#) was organized (also in Maastricht). A Barcamp is a relatively small event (<100 attendees) with no predetermined program. Open Science enthusiasts get together and propose sessions on topics they feel are worth working on. After a round of voting, the most popular sessions will be given a time slot and location. This set-up allows for a very interactive

and action focussed event. If this sounds like something you would like to attend (the Festival, Barcamp, or both), keep an eye out for our newsletters. We will keep you posted about next year's OS Festival (which will be in Groningen, date TBA).

NEWS FLASHES

- **Halloween tip.** Does data management sound scary to you? Wait until you've played the [Data Horror Escape Room](#) (developed by Data Managers from VU, and played as OSCN community event in 2021).
- MEDAL is organizing an [online workshop on how to do preregistration](#) on November 6th, 10-11:45h.
- Many events on Open Science focus on quantitative research. For those interested in [Open Science in qualitative research](#) VU is organizing an in-person meeting on November 12th.
- As you probably know, the current government announced budget cuts for higher education. This includes [a cut of 50% of the budget for Open Science](#) as of next year. There will be a [national strike](#) to protest against these announced budget cuts on November 14th, 13-15h, in Utrecht (Moreelsepark, next to Utrecht Central Station).
- The Reproducibility Network of the Netherlands (NLRN) will organize a [symposium to showcase projects related to reproducible research and replications](#). The event will be held on December 6th at UMC Groningen.
